

Element

(actual size when printed on A4 paper)

Print this PDF to check how the frame measurements compare to your existing glasses.

To compare your current glasses against these style simply place them onto the image below, you can check the scale using our ruler.

Element's two-toned, full-rimmed small rectangular plastic frames with a coloured trim on flex arms would particularly suit rounder face shapes. The narrow bridge works well for small noses. If you like them, take a look at Harley and Trenton. Suitable for higher prescriptions. Choice of three colours.
