

Payton

(actual size when printed on A4 paper)

Print this PDF to check how the frame measurements compare to your existing glasses.

To compare your current glasses against these style simply place them onto the image below, you can check the scale using our ruler.

Great for everyday wear, bendable Payton are more resilient than standard metal glasses because they contain titanium. They have stylish satin-finish thin rim around small rectangular lenses, narrow enough to suit smaller faces. Soft adjustable nose pads and plastic tips offer a comfortable, secure fit. Available in three classic colours.
