

Sapphie

(actual size when printed on A4 paper)

Print this PDF to check how the frame measurements compare to your existing glasses.

To compare your current glasses against these style simply place them onto the image below, you can check the scale using our ruler.

Sapphie's small rectangular frame with a thin metal rim and flex arms are designed for women with a small face who want a simple, practical pair of glasses; particularly those with a square-shaped face. Good choice if you like wearing your glasses at the end of your nose. Suitable for higher prescriptions, too.
