

Stan

(actual size when printed on A4 paper)

Print this PDF to check how the frame measurements compare to your existing glasses.

To compare your current glasses against these style simply place them onto the image below, you can check the scale using our ruler.

These aviator-style bendable frames are made from a sophisticated composite metal containing titanium, making them tougher than standard metal glasses. The satin finish gives a contemporary look, while the double bridge makes them stronger again. Plastic tips and soft adjustable nose pads are designed for comfort. Stan make great sunglasses - just add a coloured tint and UV coating.
