

## Trenton

(actual size when printed on A4 paper)

Print this PDF to check how the frame measurements compare to your existing glasses.

To compare your current glasses against these style simply place them onto the image below, you can check the scale using our ruler.

PLEASE NOTE : Unfortunately we stated the dimensions of these frames incorrectly in our Summer catalogue. They are shown correctly below - sorry for any confusion.

Small but bold, these small rectangular plastic frames are a great way to make a retro-style style statement. Typically very comfortable, they have plastic tips and a regular plastic nose bridge designed to distribute the weight evenly across the nose. Good for square and long-shaped faces, as well as small faces.
